Marquet Reid

I am a self-motivated web developer with a drive for solving problems. When working on a project, I am always optimistic about the outcome due to my natural intuition. The combination of my focus, attention to detail, and critical thinking make me an asset to any team or environment.

EXPERIENCE

Element 84, Junior Front-End Engineer — *Junior Web Developer*

February 2019 - PRESENT

- Convert mockups into usable website and applications using React, CSS, AWS, and other web technologies.
- Review and test customer-facing prototypes before deployment, applying best practice diagnostic techniques to verify usability.
- Collaborate with stakeholders during development processes to confirm creative proposals and design best practices.
- Maintain several component libraries and api's to ingest, convert, share, and display geospatial data.

George Washington University, Washington, DC — *Web Development Teacher's Assistant*

July 2018- February 2019

- Assisted in teaching and supporting students in learning full-stack web development using the MERN stack in an online environment.
- Maintained the class gitlab repository containing class activities, homework, and supplemental resources.
- Provided office hours in which to give one-on-one attention as well as further teaching and support of concepts, class activities, homework, and projects.

Looking Glass Cyber Solutions, Reston, VA — *Senior Cyber Intelligence Analyst*

February 2011 - February 2019

- Analyzed intelligence to create rich reports focusing on reputation management and intellectual property protection for several high profile clients.
- Managed and trained a team of associate cyber intelligence analysts in the production of over 50 reports for over 30 clients with direct oversight of 23 reports for 18 clients.
- Performed quality control reviews and delivered multiple reports to clients following up with monthly and quarterly meetings.
